## **Programme Outcomes**

PO#	PO Description
<b>PO</b> #1	Engineering knowledge: Apply the knowledge of mathematics, science, engineering
	fundamentals, and an engineering specialization to the solution of complex engineering
	problems.
<b>PO</b> #2	<b>Problem analysis</b> : Identify, formulate, review research literature, and analyze complex
	engineering problems reaching substantiated conclusions using first principles of
	mathematics, natural sciences, and engineering sciences.
<b>PO</b> #3	<b>Design/development of solutions</b> : Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations
<b>PO</b> #4	Conduct investigations of complex problems: Use research-based knowledge and
	research methods including design of experiments, analysis and interpretation of data,
	and synthesis of the information to provide valid conclusions.
<b>PO</b> #5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and
	modern engineering and IT tools including prediction and modeling to complex
	engineering activities with an understanding of the limitations.
<b>PO</b> #6	The engineer and society: Apply reasoning informed by the contextual knowledge to
	assess social, health, safety, legal and cultural issues and the consequent responsibilities
	relevant to the professional engineering practice.
<b>PO</b> #7	<b>Environment and sustainability</b> : Understand the impact of the professional engineering
	solutions in societal and environmental contexts, and demonstrate the knowledge of, and
	need for sustainable development.
<b>PO</b> #8	<b>Ethics</b> : Apply ethical principles and commit to professional ethics and responsibilities and
	norms of the engineering practice.
<b>PO</b> #9	Individual and team work: Function effectively as an individual, and as a member or
	leader in diverse teams, and in multidisciplinary settings.
<b>PO</b> #10	<b>Communication</b> : Communicate effectively on complex engineering activities with the
	engineering community and with society at large, such as, being able to comprehend and
	write effective reports and design documentation, make effective presentations, and give
	and receive clear instructions.
<b>PO</b> #11	<b>Project management and finance</b> : Demonstrate knowledge and understanding of the
	engineering and management principles and apply these to one's own work, as a member
	and leader in a team, to manage projects and in multidisciplinary environments.
PO#12	<b>Life-long learning</b> : Recognize the need for, and have the preparation and ability to
	engage in
	independent and life-long learning in the broadest context of technological change.
